

Masterglue™ Line of Conversion and Finishing Adhesives

Indispensable in the finishing phase, the adhesives are essential for compliance with quality standards, innovation and use of the final product.

Mark's **Masterglue™** Line covers Tissue Converting adhesive processes for toilet tissue, paper towels and tissues, as well as Corrugated Conversion for packaging and other purposes, ensuring optimization in yield with excellent quality and cost.

Tissue Conversion:

- Center Wrap Adhesives (tube): allow the core production with high speed, fast drying and stable rigidity.
- Transfer Adhesives: contemplate the transfer of the jumbo to the roll and finally to the tube, with clean processing, providing excellent release and adhesion.
- Laminating Adhesives: excellent coupling result between sheets, without affecting the softness of the paper.
- Tie-Down or "tail" Adhesives: give the top sheet of the roll the correct wet grip and excellent release when dry.

Corrugated Conversion:

- Coupling Adhesives: promote adhesion between sheets to obtain the desired quality and rigidity of the cardboard sheet.

- Lap Closure Stickers: meet the various end use specifications for closing boxes and paper packaging.

Relying on a multidisciplinary team with a comprehensive vision, Mark has versatility to develop innovative and viable solutions that respect the particularities and objectives of each process.

Skilled at diagnosing, implementing and monitoring solutions, Mark translates into results and suggestions for improvement each information collected in the process, demonstrating the benefits and strengthening the relationship of trust with the customer.
