

# Enzymaster™ Line for Enzymatic Treatment

Addressing the main challenges faced by pulp and paper producers, including reducing costs, improving machine operability and creating new or improved quality specifications, the **Enzymaster™** line is composed of state-of-the-art enzymes, allowing for increased profitability and factory competitiveness.

The **Enzymaster™** range is used extensively in a variety of chemical and mechanical applications for paper and recycled, with superior results in quality and economy.

The proper enzyme combination to the process is of fundamental importance, so Mark carefully scales the treatment, using enzymes in combination or individually, providing:

- Refining pulp with lower energy consumption
- Less fiber damage
- Improved yield, allowing use of a higher proportion of recycled fiber
- Optimization of key quality parameters such as bulk, softness, gloss and strength.

Relying on a multi-disciplinary team and comprehensive vision, Mark has versatility to develop innovative and viable solutions that respect the particularities and objectives of each process.

Skilled at diagnosing, implementing and monitoring solutions, Mark translates into results and suggestions for improvement each information collected in the process, demonstrating the benefits and strengthening the relationship of trust with the customer.
