

Yankeemaster™ Line Yankee Coatings

In response to the dynamics of the consumer market, tissue manufacturers are constantly innovating in search of better quality and more affordable products.

Mark, with its extensive knowledge of forming, creping, drying, and converting processes, offers tissue solutions that translate into machine performance and productivity.

The Yankee Dryer, being one of the highlights of the process, requires a chemical coating that promotes specific properties.

Mark's **Yankeemaster™** products optimize the Yankee coating, and in addition to providing the proper level of adhesion for creping operations, they improve the coating and release of the sheet on the Yankee cylinder, and protect its surface, with maximum efficiency.

Relying on a multi-disciplinary team and comprehensive vision, Mark has versatility to develop innovative and viable solutions that respect the particularities and objectives of each process.

Skilled at diagnosing, implementing and monitoring solutions, Mark translates into results and suggestions for improvement each information collected in the process, demonstrating the benefits and strengthening the relationship of trust with the customer.

Contact our representative and get to know our complete line of Yankee coatings.
