

Mark Solutions for Brown Papers and Packaging

The use of packaging paper has been increasingly expanded, protecting and packaging the most diverse products, and promoting brands. Given this, properties such as convertibility, printability, resistance to weight or moisture, among other end-use requirements, have constantly challenged paper manufacturers.

Mark understands the challenges of this segment and combines process and application knowledge, offering a complete portfolio of functional and treatment chemicals to help the manufacturer improve the performance of its processes and the competitiveness of its end products, also working to adapt to the challenges and environmental regulations that involve the paper sector.

With frequent innovations in its product line, Mark has:

- Chip Breakers
- Biocides
- Anti-foaming agent
- Bonding agents
- Flocculants and Coagulants
- Retention and Drainage Aids
- Dyes
- 1st and 2nd Resistance Agents Generation

- Additives for Deposit Control
- Chemical Cleaning Agents (Boil out)
- Conversion Stickers

Counting on a multidisciplinary team with a comprehensive vision, Mark has the versatility to develop innovative and viable solutions that respect the particularities and objectives of each process.

Skilled in diagnosing, implementing and monitoring solutions, Mark translates each information collected in the process into results and suggestions for improvement, demonstrating the benefits and strengthening the relationship of trust with the Client.
