

# Mark Solutions for Graphic and Specialty Papers

Paper manufacturers are continually challenged to provide more uniform and better quality sheets, which are suited to the diversity of paper uses, consumer requirements or technological advances in the printing industry.

To remain competitive, it is necessary to continuously develop new products, manufacturing them at the lowest cost and with the highest quality.

Combining process and application knowledge, Mark offers technology for efficient process management, through a complete portfolio of functional and treatment chemicals, helping the manufacturer to improve the performance of its processes and the quality of its final products.

In addition to adding properties to the final product, such as strength, printability or convertibility, Mark also works to adapt to the challenges and environmental regulations that involve the paper industry.

With frequent innovations in its product line, Mark has:

- Chip Breakers
- Biocides
- Anti-foaming agent
- Bonding agents
- Flocculants and Coagulants

- Retention and Drainage Aids
- Dyes, Bleaches and Flattening agents
- Resistance Agents
- Additives for Deposit Control
- Chemical Cleaning Agents (Boil out)

Counting on a multidisciplinary team with a comprehensive vision, Mark has the versatility to develop innovative and viable solutions that respect the particularities and objectives of each process.

Skilled in diagnosing, implementing and monitoring solutions, Mark translates each information collected in the process into results and suggestions for improvement, demonstrating the benefits and strengthening the relationship of trust with the Client.

Contact our representative and learn about our complete line of papermaking solutions.
