

Mark Solutions for Tissue Papers

The Tissue industry is constantly challenged by consumer demand for softer, more absorbent or stronger products, while the market requires competitive prices.

Balancing these demands and translating them into machine performance and productivity requires a partner with comprehensive process knowledge.

Mark has experts in forming, creping, drying and converting, and offers solutions to meet the productivity and quality challenges of the tissue industry.

With frequent innovations in its product line, Mark has:

- Chip Breakers
- Biocides
- Anti-foaming agent
- Flocculants and Coagulants
- Bleaches and Flatting agents
- Dry Resistance Agents
- 1st and 2nd Moist Resistance Agents Generation, and Temporary Moist
- Retention and Drainage Aids
- Additives for Deposit Control
- Chemical Cleaning Agents (Boil out)
- Softeners
- Yankee Coating
- Conversion Stickers

Mark stands out for providing 2nd grade UR Generation, through its own development and manufacturing technology. Counting on a multidisciplinary team with a comprehensive vision, Mark has the versatility to develop innovative and viable solutions that respect the particularities and objectives of each process.

Skilled in diagnosing, implementing and monitoring solutions, Mark translates each information collected in the process into results and suggestions for improvement, demonstrating the benefits and strengthening the relationship of trust with the Client.
